SUMMARY

Computer Science undergraduate (Batch 2027) with strong problem-solving skills and hands-on experience in full-stack development, AI-integrated systems, and scalable web applications. Experienced in building automation workflows, intelligent platforms, and data-driven solutions with a focus on Generative AI, RAG systems, and efficient software design.

EDUCATION

NIST University

B.Tech in Computer Science and Engineering | **9.34/10**

Sep 2023 – Sep 2027

Berhampur

Khallikote Higher Secondary School

Intermediate (12th) | **79.6%**

Aug 2021 – Feb 2023

Maa Saraswati Sishu Vidya Mandir

Matriculation (10th) | **84%**

2009 – 2021

Berhampur

WORK EXPERIENCE

Protionix Technology PVT. LTD.

4th May 2026 – 5th July 2026

Software Developer

NIST TBI, Berhampur

- Built scalable enterprise applications using Next.js, React.js, Node.js, and MongoDB, integrating secure authentication and role-based access control to support multi-user workflows at production scale.
- Collaborated with the startup team to develop scalable and production-ready features.

NIST University

MAY 2025 – JUNE 2025

Data Science & Data Analysis Intern

- Conducted data engineering and exploratory data analysis on structured datasets using Python, produced actionable visual insights via Matplotlib and Seaborn to support data-driven decision making.

NIST University

JULY 2024 – AUGUST 2024

Advanced Programming & Competitive Coding Intern

- Strengthened algorithmic problem-solving and optimization skills through intensive competitive programming, solving 50+ DSA problems under time constraints.

PROJECTS

SlotSmart | React.js, Node.js, MongoDB, NextAuth.js, JWT, Redis

- Architected an intelligent scheduling platform using conflict-free optimization algorithms, enabling automated timetable and exam management for schools reducing manual scheduling effort ~70% for 5+ Inst. through rule-based automation.
- Implemented conflict-free scheduling for classes, teachers, rooms, and examinations using optimized scheduling logic.
- Built role-based dashboards and multi-organization support for managing schedules, classrooms, and academic data.

LocalLoop: QR-Based Referral Platform for Local Businesses | Next.js, Tailwind CSS,

TypeScript, Prisma, Supabase, Cloudinary, JWT, Redis

- Developed LocalLoop, a SaaS referral platform for local businesses (cafes, gyms, salons) to track customer referrals via QR codes, reward ambassadors, and measure ROI through real-time analytics and role-based dashboards.
- Implemented robust backend logic with rate limiting (100 requests/minute per IP) to prevent abuse, JWT-based session management, and multi-tenant data isolation (Supabase + Prisma) to securely handle 100+ businesses, 10K+ monthly referrals and 5K+ ambassadors simultaneously.

AI-Powered Codebase Visualization & RAG Assistant

- Building a GenAI-powered system for semantic code search, repository analysis, and AI-generated code explanations using Retrieval-Augmented Generation (RAG).
- Implementing dependency visualization and natural language querying to improve code understanding and developer productivity.

SKILLS

Programming Languages: Java, Python, C, JavaScript

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs, NextAuth.js, JWT, Redis

Tools: Git, GitHub, VS Code

Core Skills: Full-Stack Development, Authentication Systems, Responsive Web Design, DSA

AI & Data: Generative AI, RAG Pipelines, AI/ML, Data Analysis
